

Chemical safety information sheet

Part 1 Chemicals and enterprise identification

Chemical English name: Flonicamid 50% WG

Manufacturer: Shandong Huimin Zhonglian Biotechnology Co., Ltd.

Address: Jinan City Plant Protection Science and Technology Industrial Park, Hanmiao Town, Shanghe County, Jinan City, Shandong Province, China

Emergency contact: 0543-2232666

Part 2. Overview of the hazards

2.1 GHS hazard category

Acute transoral toxicity, category 4

2.2 GHS tag elements, including preventive graphics

Warning word warning

Risk indicates that H302 swallowing is harmful

Prevention instructions

Clean thoroughly after operation P264

P270 Do not eat, drink, or smoke when using this product

Accident response P301 + P312 If swallowed by mistake, if feeling unwell, call the detoxification center / doctor

P330 gargle

Safe storage no

P501 Disposal of internal contents / containers according to local regulations

Health hazard: swallowing is harmful

Physical and chemical hazards: no data is available

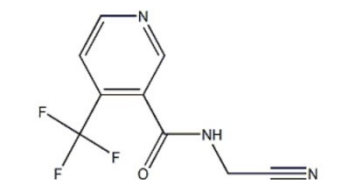

Environmental hazard: no data

Part 3 Composition / composition information

Molecular formula: C₉H₆F₃N₃O

Molecular weight: 229.2g/mol

molecular structure:

chemical name	CAS NO.	content
Flonicamid	158062-67-0	50%
Others		Make up 100%

Part 4 First aid measures

give first aid treatment:

Inhalation: If inhaled, move the patient to fresh air.

Skin contact: Take off the contaminated clothes and wash your skin thoroughly with soapy water and clean water. Seek medical advice if you feel unwell.

Eye contact: separate the eyelids, rinse with water for at least 15 minutes, and then ask a doctor for treatment. Go to a doctor immediately.

Feed: Drink a lot of water and immediately take the patient to the hospital with a label. No special antidote. symptomatic treatment.

Advice to protect the rescuer:

Transfer of patients to a safe location. ref. phys. Show this chemical safety technical manual to the doctor on the scene.

Special tips for doctors:

non-avaible

Part 5. Fire protection measures

annihilator:

Fire fighting with water mist, dry powder, foam or carbon dioxide extinguishing agent.

Avoid using straight water to extinguish the fire, which may lead to the splash of

combustible liquid and spread the fire.

Especially dangerous:

non-avaible.

Fire-fighting precautions and protective measures:

Fire fighters must wear air respirator and fire suits to put out the fire in the upwind.

Move the container from the fire to the open whenever possible.

If the container in the fire site has changed color or sounds from the safety pressure relief device, it must be evacuated immediately.

Isolate the scene of the accident and prohibit irrelevant personnel from entering.

Receiving and treat fire water to prevent environmental pollution.

Part 6 Emergency treatment emergency treatment

Protective measures, protective equipment and emergency handling procedures for operators:

It is recommended that emergency handling personnel wear air breathing apparatus, anti-static clothes and rubber oil-resistant gloves.

No contact or crossing of leaks.

All equipment used in the operation shall be grounded.

Cut off the leak source whenever possible.

Eliminate all ignition sources.

Draw the warning area according to the affected area of liquid flow, steam or dust diffusion, and the irrelevant personnel shall evacuate from the side wind and upwind to the safe area.

Environmental protection measures:

Take in leaks to avoid environmental pollution. Prevent leaks from entering sewers, surface water, and groundwater. Reception and removal methods of leaking chemicals and disposal materials used:

Small leakage: Collect the leaked liquid in an airtight container as much as possible.

Absorbed with sand, activated carbon or other inert materials and transferred to a safe place. No flushing into the sewer.

Mass leakage; embankment or pit shelter. Close the drainage pipes. Cover with a

foam to suppress evaporation. Transfer with an explosion-proof pump to the tanker or special collector, recycling or transport to the waste disposal site for disposal.

Part 7 Operational Disposal and Storage

Operational considerations:

Operational disposal shall be performed in places with local ventilation or comprehensive ventilation facilities.

When using this product, wear protective clothing and gloves to avoid inhaling liquid medicine.

Do not eat and drink water during the application period. Wash your hands and wash your face immediately after drug application.

See Part 8 for individual protection measures.

Stay away from fire and heat sources, and smoking is strictly prohibited in the workplace.

Use an explosion-proof ventilation system and equipment.

If canned, the flow rate shall be controlled and grounded to prevent static build-up.

Avoid contact with prohibited substances such as oxidants (see part 10).

When handling, light loading and unloading, to prevent damage to packaging and containers.

The empty container may contain harmful substances.

Wash your hands after use, and avoid eating in the workplace.

Equipped with the corresponding variety and quantity of fire-fighting equipment and leakage emergency treatment equipment.

Storage considerations:

Store in a dry, cool, ventilated warehouse.

It should be stored separately from oxidants and edible chemicals, and should not be mixed (see part 10 for prohibited compounds).

Place in children, irrelevant personnel out of reach, and lock.

It shall not be stored together with food, beverage, food, feed and other articles.

Stay away from the fire and heat sources.

The warehouse must be installed with lightning protection equipment.

The exhaust system shall be equipped with a grounding device to remove static electricity.

Explosion-proof lighting and ventilation setting are used.

No spark prone equipment and tools.

The storage area shall be equipped with leakage emergency treatment equipment and suitable shelter materials.

Part 8: Contact Control / Personal Protection

Occupational exposure limits:

Component name	CAS	Standard source	type	standard value	remarks
Flonicamid	158062-67-0	GBZ 2.1--2007	MAC	—	It is not stipulated
			PC-TWA	—	
			PC-STEL	—	

Biological limitations:

non-available

Monitoring method:

GBZ / T 160.1 ~ GBZ / T 160.81-2004 (Series standard), EN14042 Workplace Air Guidelines for assessing exposure to chemical or biological reagents.

engineering control:

Worksites are recommended to be separated from other workplaces.

Closed operation to prevent leakage. Strengthen ventilation.

Set up the automatic alarm device and the accident ventilation facilities. Set up emergency evacuation channels and necessary evacuation areas.

Set up the red area warning line, warning mark and Chinese warning instructions, and set up the communication alarm system. Provide safe shower and eye washing equipment.

Personal protective equipment:

Respiratory system protection: when the air concentration exceeds the standard, wear a filter gas mask (half mask). For emergency rescue or evacuation, a portable air breathing apparatus should be worn. Hand protection: wear rubber and

oil-resistant gloves.

Eye protection: Wear chemical safety protection for the eyes.

Skin and body protection: wear poison overalls.

Part 9, the physicochemical properties

Appearance and traits: Brown Granule

PH value: no data melting point / setting point (° C): no data

Boiling point, initial boiling point and boiling range (° C): 406.57 ° C at 760mmHg

spontaneous combustion temperature (° C): no data

Flash point (° C): 199.687° C decomposition temperature (° C): no data

Explosion limit [% (volume fraction)]: no data evaporation rate [acetic acid (positive) butyl ester in 1]: no data

Saturated steam pressure (kPa): 0mmHg at 25° C Flammability: (solid, gas): no data

Relative density (water in 1): 1.377g / cm³ Steam density (air in 1): no data

Odor threshold (mg/m3): no data n-octanol / water distribution coefficient (lgP): no data

Solubility: no data viscosity: no data

Part 10: Stability and Reactivity

stability:

Storage and use at normal ambient temperature, the product is stable. Hazardous

reactions:

non-avaible.

Conditions to avoid contact:

Electrostatic discharge, heat, moisture, etc. Prohibited:

Strong oxide, strong acid, strong base. Hazardous decomposition products:

non-avaible.

Part 11, Toxicology information

acute toxicity:

Through the mouth: no information

Inhalation: no information

Percutaneous: no data

Skin irritation or corrosion:

non-avaible.

Eye irritation or corrosion:

non-avaible.

Respiratory or skin allergy:

non-avaible.

Germ cell mutation sex:

non-avaible.

carcinogenicity:

non-avaible.

genotoxicity:

non-avaible

Specific target organ system toxicity — primary contact:

non-avaible.

Specific target organ system toxicity — repeated exposure:

non-avaible.

inhalation hazard:

non-avaible.

Part 12, Ecological information

Eco-toxicity:

Acute toxicity test in fish: no data.

Acute activity inhibition test: no data.

Algal growth inhibition test: no data

Toxicity to microorganisms: no data are available

Persistence and degradability:

non-avaible.

Biological enrichment or bioaccumulability:

non-avaible.

Mobility in the soil:

non-avaible.

Part 13 Waste disposal

Waste chemicals:

Recycle it as much as possible.

If it cannot be recycled, use the incineration method for disposal. The product shall not be discarded by means of discharge into the sewer.

Pollution packaging:

Return the containers to the manufacturer or dispose in accordance with national and local regulations.

Waste considerations:

Refer to the relevant national and local laws and regulations before waste disposal.

See Part 8 for safety precautions for disposal personnel.

Part 14 of Transportation Information

DOMESTIC TRANSPORT:

Not classified as a dangerous good under transport regulations

SEA TRANSPORT, IMDG

Not classified as a dangerous good under transport regulations

AIR TRANSPORT, IATA/ICAO

Not classified as a dangerous good under transport regulations

Part 15 of the Regulatory Information

Hazards signs and announcements shall be posted on the means of transport according to the relevant transport requirements.

The following laws, regulations, rules and standards shall regulate the management of the chemicals accordingly:

Component flonicamid CAS: 158062-67-0

The Occupational Disease Prevention Law of the People's Republic of China:

Classification list of occupational-disease-inductive factors (2015): not included

Regulations on the Safety Management of Hazardous Chemicals:

List of Dangerous Goods and Chemicals (2015): not included

List of easily explosive hazardous chemicals (2017): not included

List of hazardous chemicals under key supervision:

List of the first batch of hazardous
chemicals and the second batch of
key supervision: not included in the
Measures for the Registration of
Hazardous Chemicals (trial): List of
hazardous chemicals under key
environmental management: not
included

Regulations on the administration of narcotic drugs and psychoactive drugs:

List of narcotic drugs varieties: not included

List of psychotropic drugs varieties: not included

New Measures for the Environmental Management of Chemical Substances:

China's existing Chemical substance List (2013): not included

Part 16, Additional Information

Write and revise the information:

This edition is version 1.0, compiled according to GB / T 16483-2008, GB / T 17519-2013 and GB 30000 series classification standards.

disclaimer:

The information in this SDS applies only to the products specified, unless otherwise specified, not for the mixture of this product and other substances.

This SDS provides only information on the safety of the product use to those

appropriately professionally trained users of the product.

Users of this SDS shall make an independent judgment on the applicability of the SDS. The writer of this SDS will not be responsible for any injuries resulting from the use of this SDS.
