Safety Data Sheet

1. CHEMICAL IDENTIFICATION AND COMPANY INFORMATION

Product Name: Sodium-Nitrophenolate 85% Tech

Other names:

Product category: Plant Growth Regulator

Enterprise Name: ZHENGZHOU ZHENG SHI CHEMICAL CO., LTD

Address: East Side, 25th Floor, Building 1, International Enterprise Center, No. 72 Nongye Road, Zhengzhou City

Postal Code: 450008

Enterprise phone number: 0371-63817136

Fax number: 0371-63845000

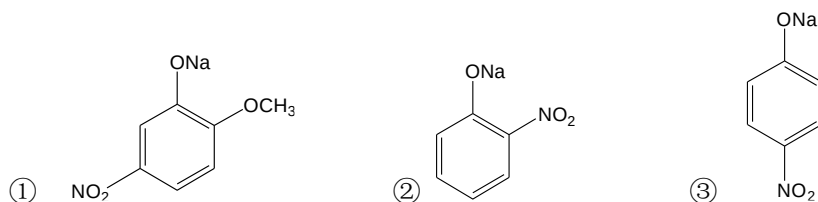

Email address:

2. Composition / Information on Ingredients

Chemical name of Active ingredient: Sodium 5-nitroguaiacol, sodium o-nitrophenol, sodium p-nitrophenol

Content: 85%

Structure:

CAS No: ①: 67233-85-6 ②: 824-39-5 ③: 824—78-2

Formula: ①: $C_7H_6O_4NNa$ ②: $C_6H_4O_3NNa$ ③: $C_6H_4O_3NNa$

Molecular Weight: ①: 181.12 ②: 161.10 ③: 161.10

Main physical and chemical properties:

3. Hazard identification

Risk category: low toxicity

Routes of invasion: skin contact, eye contact, respiratory inhalation, gastrointestinal ingestion

Health hazards: Direct contact with the above pathways will cause discomfort to the human body,

but will not cause serious harm to health

Environmental hazards: Aquatic: LC50(96h mg/L) Rainbow Trout 5.7, blue gill Sunfish 3.0; For bees: LC50(96h contact)>234µg/ bee; Natural enemies: acute transoral LD50mg/kg quail >2150, LC50(8-day dietary mg/kg) North American quail and quail >5000; Soil and water conservation: 4-30 days half-life in soil, Koc351-894. It is safe to prey on mites, ladybugs, wasps, spiders and other natural enemies. It is highly toxic to silkworm, and it is forbidden to use in mulberry garden during silkworm rearing season. Pay attention to the safety of silkworm

Explosion hazard: This product is explosive, flammable and toxic

4. First-aid measures

Skin contact: Remove contaminated clothing and rinse skin thoroughly with soapy water and clean water.

Eye contact: Lift eyelids and rinse with running water or saline. Seek medical attention.

Inhalation: Quickly remove from the scene to fresh air. Keep your airway clear. Administer oxygen if breathing is difficult. If breathing stops, give artificial respiration immediately. Seek medical attention.

Ingestion: Drink enough warm water to induce vomiting and seek medical attention

5. Fire-fighting measures

Dangerous characteristics: fire, high temperature, friction, vibration or contact with alkaline substances, oxidants are easy to cause explosion. It can chemically react with heavy metal powder to form metal salt and increase sensitivity. When the dust is flowing and stirring, there will be static accumulation.

Harmful combustion products: carbon monoxide, carbon dioxide, nitrogen oxide.

Fire extinguishing precautions: In case of fire, fire personnel must operate in a protected shelter.

Fire extinguishing agent: mist water, foam, carbon dioxide. Do not use sand for capping

6. Accidental release measure

Emergency treatment: isolate the contaminated area and restrict access. Cut off the fire. It is recommended that emergency personnel wear dust masks (full face masks) and protective clothing. Do not contact spills directly. Small leakage: Avoid dust and collect in a dry, clean, covered container with a clean shovel. It can also be washed with a lot of water and diluted into

the waste water system. Large spills: Moisten with water, then collect and recycle or transport to waste disposal sites for disposal.

Elimination method: Transfer to tank truck or special collector with explosion-proof pump, recycle or transport to waste treatment site for disposal

7. Handling and Storage

Operation precautions: closed operation, full ventilation. Operators must be specially trained and strictly abide by the operating procedures. It is recommended that operators wear a ducted gas mask, a rubber cloth anti-poison jacket, and rubber oil-resistant gloves. Keep away from fire and heat. No smoking in the workplace. When handling, light loading and unloading should be done to prevent damage to packaging and containers. Equipped with the corresponding variety and quantity of fire equipment and leakage emergency treatment equipment. Empty containers may have harmful residues.

Storage precautions: Store in cool, dry, ventilated special explosive warehouse. Keep away from fire and heat. The temperature of the reservoir should not exceed 30°C. It should be stored separately from oxidants, alkalis, active metal powders and edible chemicals, and should not be mixed. Explosion-proof lighting and ventilation facilities are adopted. Do not use mechanical equipment and tools that are prone to spark. Storage areas should be equipped with suitable materials to contain leaks. Do not shock, impact and friction.

8. Exposure Controls and Personal Protection

Maximum allowable concentration: No data

Monitoring methodology: No data available

Engineering control: the production process is fully ventilated

Respiratory protection: dust masks

Eye protection: safety masks

Body protection: protective clothing

Hand protection: protective gloves

Other protection:

smoking and eating are prohibited at the work site. Bathe and change clothes after work. Practice good hygiene and practice pre-employment and regular medical check-ups

9. Physical and Chemical Properties

Product appearance and properties: Red, yellow acicular crystals

pH: 7.0~8.0

Melting point(°C): ①: 105-106°C ②: 44.9°C ③: 113-114°C

Density:

Boiling point (°C): no data

Relative vapor density: no data

Vapor pressure (kPa): no data

Heat of combustion (kJ/mol): no data

Critical temperature (°C): no data

Critical pressure (MPa): No data

Octanol/water partition coefficient: no data available

Flash point (°C): No flash point before boiling

Explosion limit %(V/V): No data

Auto-ignition temperature (°C): No data

Lower explosion limit % (V/V): No data

Solubility: Soluble in water, soluble in water under the free acid state, soluble in acetone, ethyl ether, ethanol, chloroform and other organic solvents

Main use: Plant Growth Regulator

Other physical and chemical properties: non-flammable, non-corrosive substances

10. Stability and Reactivity

Stability:

Forbidden substances: Strong oxidizing agent, strong base, acyl chloride, acid anhydride, active metal powder

Avoid contact conditions: Glare

Aggregation hazard: None

Decomposition products: Carbon oxide, nitrogen oxide

11. Toxicological information

Acute toxicity: ① : The acute transoral LD50 of male and female rats was > 3100mg/kg and 1270mg/kg, respectively; ② : The acute transoral LD50 of male and female rats was 1460mg/kg

and 2050mg/kg, respectively; ③ : The acute transoral LD50 of male and female rats was > 482mg/kg and 1250mg/kg, respectively.

Subchronic toxicity: ① : No dose of 400 mg/kg • day in 3-month feeding experiment; ② : The oral dose of subchronic toxic mice was 1350mg/kg • day; ③ : No effective dose of mice for 3 months feeding experiment 480 mg/kg • day.

Irritation: ① : no irritation to the eyes and skin; ② : no irritating effect on eyes and skin; ③ : No irritating effect on eyes and skin.

Sensitization: No sensitization to guinea pigs.

Mutagenicity: No mutagenicity in the test dose

Teratogenicity: no data available

Carcinogenicity: No data available

Other: No data available

12. Ecological Information

Ecotoxicity:

Biodegradability: No data available

Non-biodegradability: No data available

Bioconcentration or bioaccumulation: No data available

Other harmful effects: No data available

13. Disposal considerations

Nature of waste: hazardous waste.

Precautions for disposal: Please refer to relevant national and local regulations before disposal.

Incineration is recommended for disposal

14. Transport Information

Dangerous Goods Number: 4.1

UN Number: UN 1325

Packing mark:

Package type: III

Packing method:

15. Regulatory Information

Regulations on the Safety Administration of Chemical Dangerous Substances (issued by The State Council on February 17, 1987), Rules for the Implementation of Regulations on the Safety Administration of Chemical Dangerous Substances (Hualofa [1992] No. 677), Regulations on the safe Use of Chemicals in workplaces ([1996] No. 423), etc. Relevant provisions are made for the safe use, production, storage, transportation, loading and unloading of chemical dangerous goods. The classification and marking of commonly used hazardous chemicals (GB 13690-92) classifies the substance as a Class 1 explosive

16. Other Information

The above information is considered correct, but does not contain all information and is used as a guide only. The information in this document is based on our current knowledge and applies to this product as far as proper safety tips are concerned. This information does not represent a guarantee of the nature of this product. Zhengzhou Zheng Shi Chemical Co., Ltd. is not responsible for any damage caused by any operation or contact with the above products.
