

MATERIAL SAFETY DATA SHEET

Revision date: January 23, 2024

Initial revision date: April 6, 2021

Version number: 1.5

1. Product and supplier data		
Product name:	Surfactant 815A -I	
Product number:	815A -I	
Manufacturer and supplier name:	Nanjing Kaiyuan New Materials Technology Co., Ltd	
Supplier Address:	A1-1616, Nanjing National Agricultural Innovation Park Science and Technology Innovation Center, No. 8 Xingzhi Road, Pukou District, Nanjing, China	
Telephone number:	02558600757	
Emergency Phone Number	02558600757	
2. Composition,information on ingredients		
Component-Chemical Name&Common Names	CAS NO.	Content
Sodium lauryl polyoxyethylene ether sulfate	9004-82-4	35-45%
Alkyl polyglycoside	141464-42-8	15-20%
Fatty alcohol polyoxyethylene ether mixture	68213-23-0	3-5%
Water	7732-18-5	30-40%
3. Hazard identification data		
Hazard Classification: Non hazardous, may cause eye irritation		
Label elements: This product is not hazardous in its solid state.		
Other elements: There are no other hazards when in solid state.		
4.First aid measures		

Emergency rescue method to different kinds of exposure

Inhalation : Unable to inhale.

Eye contact : Immediately rinse with clean water for a few minutes; Keep the eyelids open. If you feel unwell, seek medical attention immediately.

Skin contact : Rinse with clean water.

Ingestion : If a person is awake, rinse their mouth and drink plenty of water (about 500 milliliters). Do not induce vomiting. If the consumption is high, seek medical attention.

Most important symptom and hazard effect : None.

Protection for emergency rescue members : None.

Reminders to physicians : Liquid substances.

5.Fire extinguishing measures

Type of fire extinguisher to be used : Non flammable, water spray, spray, foam, powder, carbon dioxide extinguisher can be used.

Special fire extinguisher procedure : None.

Special protection gear of fire fighting team : None.

Burning residue : None.

6.Accidental release measures

Personal important reminders : Worker protection can be found in Section 8.

Environment important reminders : Prevent large amounts from being discharged into sewers or waterways. Send this material and container to a hazardous or special waste disposal station for disposal.

Cleaning method : When splashing for a long time, use inert materials to control the splashed material; Absorb in vermiculite, dry sand, or soil. Place in containers according to local regulations for disposal. When the amount is small, a large amount of water can be flushed into the sewer.

7.Safety handling and storage method

Handling : Pay attention to liquid splashing into the eyes during processing. General preventive measures for handling chemicals should be followed

Storage : There are no special storage precautions. For further information, please refer to the product data sheet.

8.Exposure controls, personal protection

Note: There is no established exposure limit.

Engineering control provides eye wash stations.

Personal protection:

Wear chemical resistant gloves when in long-term or repeated contact with hands.

Use protective gloves made of chloroprene rubber or nitrile rubber.

Wear appropriate safety goggles for your eyes.

9.Physical and chemical properties

Material status: Liquid.

1705

Nanjing Kaiyuan New Materials Technology Co., Ltd

Color: Colorless to light yellow liquid
Odor: Slight odor
Boiling Point: No Data
Melting Point: No Data
Decomposition temperature: No Data
Flash point: Not Applicable
Explosion limit(%): Not Applicable
Self-ignition temperature: Not Applicable
Specific Gravity: 1.05-1.06
Solubility: Soluble
Vapor pressure: No Data
10.Stability and reactivity
Stability/Reactivity: Generally stable.
Hazardous decomposition materials: Stability is generally stable. Dangerous decomposition products have no known typical hazardous decomposition products.
Conditions that must be avoided: Avoid prolonged high temperatures and exposure to sunlight.
Materials to be avoided: No Data.
11.Toxicological information
Acute toxic: No data available, swallowing may be harmful
Chronic toxic: No data available, irritating to the eyes.
Carcinogenicity: No data available.
Mutagenicity: Mammalian cell gene mutation test species: Chinese hamster ovarian cells With or without metabolic activation: negative
Genital Toxicity: No Data.
Teratogenicity: No Data.
Special effects: No Data.
12.Ecological information
Possible effects in the environment: Extremely toxic to aquatic organisms, with long-lasting effects.
Toxic in water: According to analogy, it is toxic to fish, Unpublished report. Highly toxic to algae. The information provided is based on similar material data: Unpublished report.
Mobility: No
Bio-cumulative: According to analogy, there is no potential biological accumulation.
13.Disposal considerations

有人
32

Kyan Nanjing Kaiyuan New Materials Technology Co., Ltd

Avoid releasing into the environment.

This product is not allowed to be discharged into sewers, waterways, or soil.

To comply with local and national regulations for the disposal of hazardous waste. Cannot be treated as household waste.

14.Transport information

Land transportation

Sea freight

air transport

Other information: Non hazardous materials that comply with international transportation regulations.

15.Regulatory information

The latest versions of the following laws, regulations, and standards have made corresponding provisions for the classification, SDS, and labeling of this chemical: - General Principles for Chemical Classification and Hazard Disclosure, GB 13690

-Series of standards for chemical classification, warning labels, and warning instructions, GB30000.2~GB30000.29

-Regulations for the Writing of Chemical Safety Labels, GB 15258

-Chemical Safety Technical Instructions - Content and Project Sequence, GB/T 16483

16.Other information

The content information of this MSDS should be fully understood and accepted by all company personnel who use, transport, store, or expose this product, and applied to the use, processing, process, or management of work regulations related to this product. The latest information may have been included in the compilation of this MSDS material, but no guarantee is given for all content. This table should be used in conjunction with the technical table but cannot replace the technical table. Therefore, this information is only related to the specific product specified. If the product is mixed with other materials or used in another production process, this data sheet may be invalid, unless otherwise specified. This form does not exempt users from their obligation to ensure compliance with all regulations related to their activities.
